

MIMA® Series products

Standard Configuration

- Electric Power Steering System (TEP)
- Curtis Controller
- AC Drive System
- Electromagnetic Brake
- Solid PU Wheel
- Curve Control Technology
- Hour meter (Standard for TEP)
- Electric Lift-limited (standard for TEP)
- Intelligent Charger

Optional

- Reversing buzzer
- Arm Rest(TE)
- Alarm light
- Imported battery
- High capacity battery
- Side pull battery
- Explosion-proof use
- Cold storage use
- AGV type

ELECTRIC PALLET TRUCK

- ◉ Load Capacity: TE 2000–4000kg, TEP 2000–2500kg
- High Stability Design
- New Handle
- Electric Power Steering System(Standard for TEP)

VALUE (Based On High Efficient Design Concept)

High stability:
TEP:Auxiliary wheel linkage design, effectively distribute stress, induce tilt trend, decrease vehicle rollover possibility;
Pull rod lifting design, highly delay deformation of pull rod, axle joint and others, reliable components, making vehicle more durable;
TE/TEP:AC Vertical drive saves inner space, easy to maintain, effectively reduces the erosion of dust and humidity to motor, improve motor efficiency, more strong overload capacity.

New handle:
According to ergonomic principles, optimize belly switch and other key components, based on 300000 times strengthening test, to improve the parts constantly, it's reliable and durable,making operation more convenient.

Electric power steering system (standard configuration for TEP series), with convenient steering and comfort operation .

Safety protection :
TEP: When arm rest is put down to the original position, it automatically reduces max travel speed, effectively protects the safety of operator.
TE/TEP:Curve control technology: Curve automatic reducing speed function can effectively prevent rollover, making operation more safe.
