

MIMA® Series products

Standard Configuration

- Curtis Controller
- AC Drive System
- EPS (TKA10)
- High Capacity Battery
- Oil Cut-off Safe Valve
- Safety Lock Of Forward Cylinder
- Adjustable Wheelbase
- Curve Control Technology
- Solid Tyre

Optional

- Side Shifter
- Rear Rubber Tyre
- Non-marking Wheel
- Imported Battery
- Safety Belt
- Led Head Lamp
- Special Use For Drive-in Rack
- Explosion-proof Use

3-WHEEL ELECTRIC FORKLIFT TRUCK

- TKA Series load capacity 1000-1500 Kg
- Lift Height :3000-4500mm
- The Design of adjustable wheelbase
- Mini Design (For floors' using)

MIMA® 米玛®

VALUE (Based On High Efficient Design Concept)

Small volume and light weight are convenient to get in and out of elevators. It' s the best choice to work inside floors.

work inside floors.

Adjustable wheelbase: when the mast tilts forward, the wheelbase is smaller, the turning radius is smaller with it, more nimble. When the mast tilts backward, the wheelbase is bigger, strengths the stability of the forklift .

EPS(TKA10 standard equipment) reduces 20% capacity consumption, strengthens cruising power ability.

Driving parallel arrangement, direct transmission reduces capacity consumption maximumly. Compact structure of the driving system makes more use of the space of the forklift, lifts transmission efficiency, reduces capacity consumption and noise.

Curve control technology: when the forklift turns, the curve control technology can reduce its driving speed automaticly , it connects dynamic stable safe system with much low gravity center function , to protect the goods and operator in safe condition.
